

Wayne County Starting Points Family Resource Center

The Wayne County Starting Points FRC works to promote literacy, health, nutrition, and safe environments. We strive to build a stronger community support for families with young children. Starting Points coordinates parent workshops, children's educational activities, and health and safety events/fairs. The center works towards increasing community involvement, education, and public awareness regarding children's health, education, nutrition, and safety needs. Wayne County Starting Points serves all families regardless of income.
