

PARENT-IMPLEMENTED TRAINING FOR **AUTISM** THROUGH TELEMEDICINE

PITAT 

Do you have a child with autism? Do you want to learn how to teach your child new skills?

Researchers from West Virginia University are looking for parents that want to learn how to teach new skills to their children with autism. The study will teach parents how to implement Discrete Trial/ABA training through written instructions or video. There is no cost to participate in this study. This study has been approved by the WVU Institutional Review Board (IRB), which ensures that research studies are done in an ethical manner.

Parents may be eligible if they:

- Have a child between 18 and 48 months of age who meets the diagnostic criteria for autism or is suspected of having autism
- Live in West Virginia
- Are willing to participate in a year-long research study

Benefits:

- Families may benefit directly from this study by being trained in ABA therapy and receiving individualized feedback.
- Parents will conduct ABA sessions in their homes and are only required to travel for pre-training and post-training assessments.
- Parents will be given a video camera to videotape themselves working with their children.
